## Rough-Cut Screening: *Be Part of the Creative Process!*

Judy Irving (*The Wild Parrots of Telegraph Hill*) meets flying dinosaurs in *Pelican Dreams*, her new, in-progress feature documentary about California brown pelicans.

Come and be part of the creative process: In addition to Q&A, Judy will ask for audience feedback (via a brief written questionnaire) after the 80-minute screening.

*Pelican Dreams* is about wildness: How close can we get to a wild creature without taming or harming it? Why do we need wildness in our lives, and how can we protect it?

Meet "Gigi," a starving young bird who stopped traffic on the Golden Gate Bridge, and "Morro," an injured pelican who makes friends with a duck. You will never look at "flying dinosaurs" the same way again.
